Topic: Discussion of issues related to multi-site evaluation of HIV/AIDS services along the US/Mexico Border, as well as presentation of preliminary data collected by five demonstration sites.

**Presentation Time by Project:** 15 minutes each (5-projects and Centro de Evaluation) - allows about 30 minutes for group discussion - Presentations may cover information you presented at the Grantees Meeting in DC

**Handouts:** We may not be able to use power point projection, therefore everyone is asked to bring copies of their power point presentation for distribution to all participants, as well as your power point presentation on disk. We suggest a minimum of 25 copies for distribution. You will verbally present your information and may direct attendees to refer to information on your handouts. I will attempt to have our table located near a wall where we can project against the wall while you present, but this is not a guarantee.
